Create Text to Speech Services

The screenshot displays the IBM Cloud console interface for the 'Text to Speech' service. The top navigation bar shows the IBM logo and several open tabs: 'Webmail Login', 'IBM Watson Service Page', and 'IBM Watson IoT Platform'. The main header includes a search bar and links to 'Catalog', 'Manage', and 'Rithick K's Account'. The left sidebar contains a 'Resource list' with the following items: 'Manage', 'Getting started', 'Service credentials' (highlighted), 'Plan', and 'Connections'. The main content area is titled 'Text to Speech-wq' and shows a status of 'Active'. Below this, the 'Service credentials' section provides instructions on generating credentials and includes a search bar. A table lists the existing credentials:

Key name	Date created
Auto-generated service credentials	2022-11-07 1:31 PM

A blue box highlights the 'Auto-generated service credentials' entry in the table. A 'New credential' button is visible in the top right corner of the credentials section.
